

Imanol Villa

Computer Science Student

Sandwich, IL 60548

630-649-0143

imanolv1249@gmail.com

Education

Aurora University (Currently Enrolled)

8/2020- Expected: 5/2024

Highschool Diploma

Plano Highschool

8/2016-2020

Graduated with a 3.6 GPA, took introduction to programming, and many other computer based classes

Work Experience

Stocker

Rural King

Midwestern Hardware Store

6/2020 - 1/2021

Description

Consisted of primarily intense physical labor, especially in cold weather. Teamwork as well as product knowledge. Inventory control, as well as communication. Had to be very flexible with specific departments since it was a small store.

Menards

Midwestern Hardware Store

6/2021-8/2021

Description

Mainly physical labor intensive, much more teamwork than before as well as helping customers around the store. Much more product knowledge, as well as store knowledge. Managed to get “numbers”, in Menards means you are a trusted employee and you are now responsible to update product stock in their system. (Most employees don't get their numbers until a year into their time working there). Was promoted at the to an outside worker for the last 3 months of work because they thought i was

responsible and hardworking enough to manage the outside area with a select handful of others, while also trained me in getting my forklifting license.

Skills

| | | | |
|------------------------|--------------------|--------------------------------|-----------------------|
| Communication | Teamwork | Adaptive to Environment | Flexibility |
| Time Management | Soft Skills | Python | Problem Solver |
| Forklift | HTML | | Hard Worker |

Future Plans

Will work on getting my CompTIA A+ certification in order to be able to provide professional IT work in the field. Also learning another programming language other than Python. Preferably a Compiler language, since Python is an Interpreter language. As well as work on acquiring more skills that will help me with my current Major.

Project

Built my very own computer from scratch, Also made it an ITX computer so it was much more of a hassle to deal with because of its small form factor.
